Ideal for small craft stored in fresh or salt water with fluctuations between zero and four feet during boating season. Providing the same high performance for your PWC that the SunLift™ provides for your boat, the SunLift Mini™ utilizes high-speed hydraulics to launch and lift your PWC in seconds. The solar charging option gives you an automated lift even without dock power and the DualMini SunLift™ bundle enables two PWCs to be lifted and launched using a single PowerPack.

Durable Construction

- Underwater-designed hydraulics plus stainless rams and hose fittings for fresh or salt water
- Patented SuperBunks™ are better for your craft and more durable
- Corrosion-resistant aluminum structure with stainless steel hardware
- Decorative and durable lockable fiberglass PowerPack box

Designed For Easy Use

- Fast and quiet
- Water-resistant transmitters, and advanced remote control technology
- Solar or AC charged

Safe & Reliable

- Patented Over-center GravityLock™ safety designed to keep craft up
- Environmentally-friendly, water-soluble hydraulic fluid
- Industry leading 3 year warranty on components as well as structure
